**SURFACE INSPECTION
COMPLIANCE REPORT**

Date of Inspection: September 10, 2003

Case Serial No.: UTU-070665

Operator: Anchor Aquarium

Project Description: Quarry Zebra Rock

Legal Description: E $\frac{1}{2}$ SE $\frac{1}{4}$ Section 9, T. 23 S., R. 13 W.

Field Office: Fillmore

Inspector: Larry Garahana

RECEIVED

SEP 17 2003

DIV OF OIL GAS & MINING

REPORT NARRATIVE (REFERENCE STIPULATIONS BY NUMBER OR TITLE)

The last inspection on this notice was on June 23, 1998. On July 8, 1998 our office closed this file because of inactivity and the insignificance of the disturbance. A letter was sent to Larry and Virginia Gehre (Anchor Aquarium) informing them of our actions on the above mentioned date.

In August of this year Tom Munson informed us that the Gerhes had kept the small mine open with UDOGM all these years.

This inspection found there had been no further work conducted at this site since the original disturbance (looks like one small blast to the outcrop, see photos). I had trouble finding any road or tracks leading up to the hill, and found no signs of mining activity.

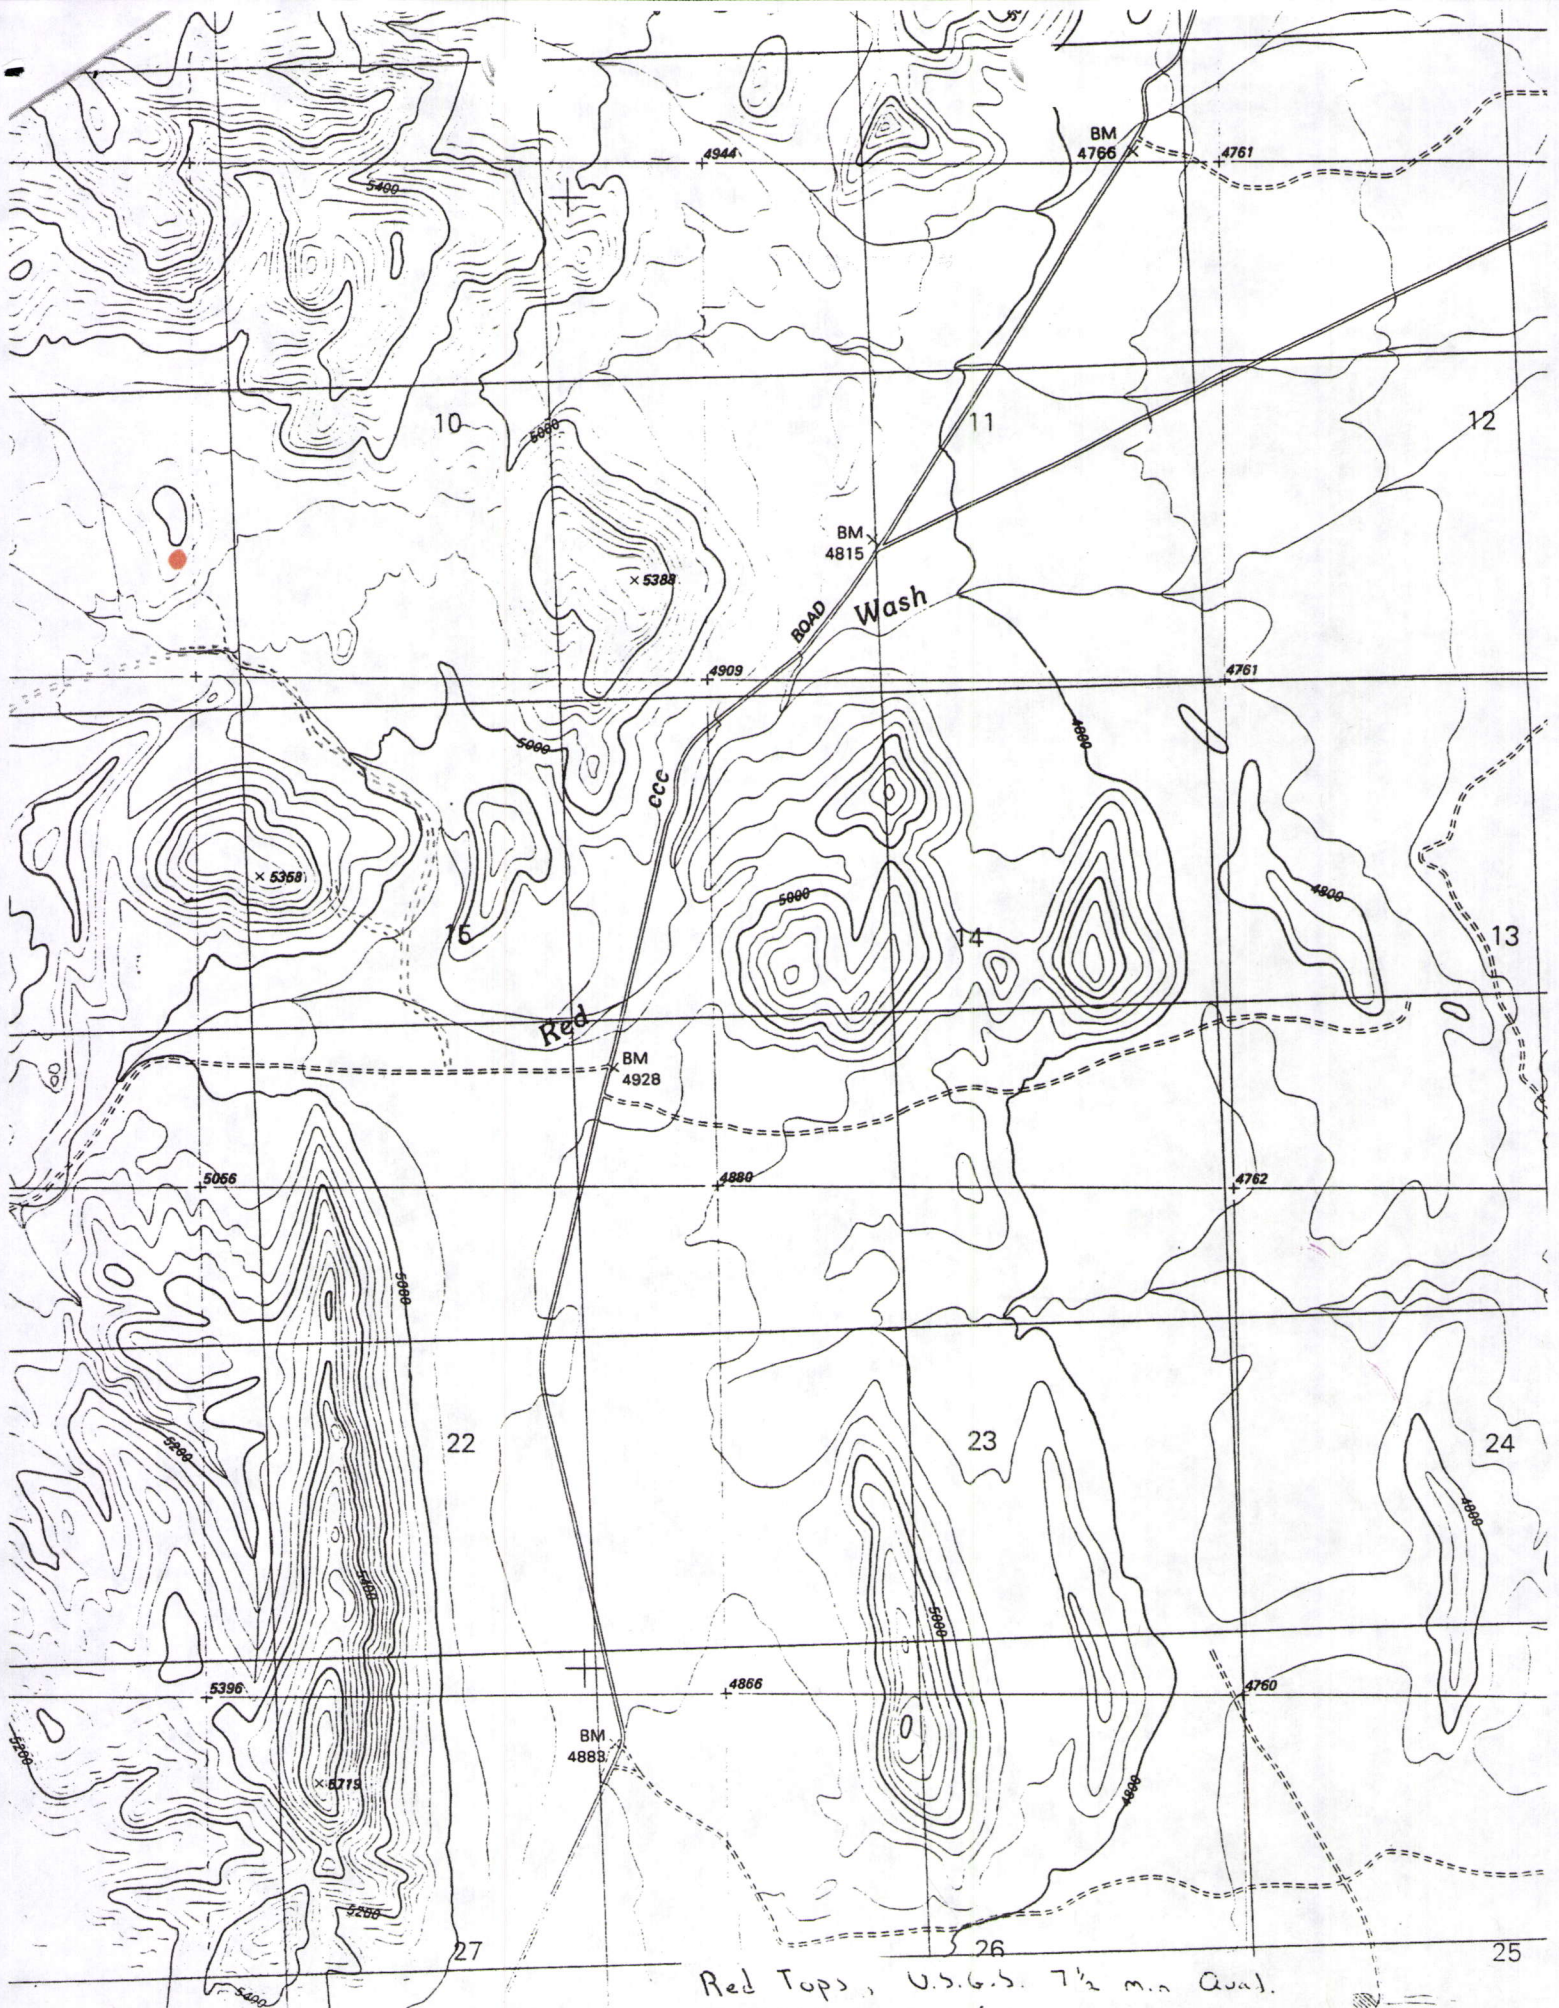

If the Gerhes wish to maintain this site they'll need to file a plan and a bond since they missed the deadline to extend their notice.

We may need to contact the Gehres and see how they want to handle this situation.
